

SYSTEM, METHOD AND COMPUTER PROGRAM PRODUCT FOR A GAS STATION SUPPLY CHAIN MANAGEMENT FRAMEWORK

5

ABSTRACT

- A system, method and computer program product are disclosed for managing a gas station supply chain utilizing a network. A network is utilized to receive data from a plurality of gas station outlets of a gas station supply chain in which the data relates to the sale of gas station goods and services by the gas station outlets. An electronic order form is generated based on the data for ordering gas station goods and services from a gas station distributor of the gas station supply chain. The data is transmitted via the network to the gas station distributor of the gas station supply chain. The data is also transmitted to a gas station supplier of the gas station supply chain utilizing the network.
- 10
- 15 Additionally, activity in the gas station supply chain is forecast utilizing the data.
